About me

A web development enthusiast with expertise in frontend development and exposure to backend development having strong fundamental knowledge of Javascript and browser internals. Having worked with great SaaS startups, I enjoy a demanding position and am always looking to expand my knowledge. A big fan of simple and clean code. Lately I've been more into reverse engineering.

Experience

ContractPodAI (Remote, UK) 2022 - 2022

Sr. Frontend Consultant - JS/TS Expert (Contract)

- Implemented significant features to their contract management software.
- Worked across projects and took ownership of the development process.
- Onboarded new joiners to these projects and mentored them in the development.

Skills: React, Typescript, OfficeJs

Neighborhoods (Remote, US) 2021 - 2022

Frontend Engineer (Contract)

- Worked on the revamp of their web application to improve the performance.
- Developed everything from scratch with focus on code performance & modularity.
- Created a custom React components library to be used across the project.
- The lighthouse score of the new website significantly increased from 35 to 77.
- Worked on other project (55places) simultaneously and developed some significant features there.

Skills: React, Typescript, Storybook, Recharts, Redux-toolkit, Jest

AvataraCloud (Remote, US) 2020 - 2021

Senior Frontend Consultant (Contract)

- Worked on a React and Twilio based real-time desktop application.
- Developed real-time features like voice/video calling, sms/email invites, screen sharing, mute/unmute participants, etc.
- Developed APIs in the backend and intergrated them on the frontend.

Skills: React, Twilio, Typescript, MaterialUI, React Context, NodeJs

Caroobi (India) 2019 - 2020

Frontend Engineer

- Worked on the user facing web application. Optimized the older version, added some new features & rolled out its v2 resulting in increased customer activity.
- Simultaneously worked on Mechanic portal (PWA) developing some of the complex features for the dashboard & automotive parts e-commerce.
- Created a whole new user funnel replacing the previous one in a weeks time.

Skills: React, Redux, Jest, Ruby on Rails, Google Tag Manager

Wisitech (India) 2018 - 2019

Software Developer

- Worked for a Dubai based startup to develop their one-stop social and e-commerce website.
- Led the frontend development process and worked across the modules. Analyzed the requirements and created the basic structure of different modules.
- Created the reusable components, directives & pipes and integrated them.

Skills: Angular, Typescript, Jest

Accenture (India) 2017 - 2018

Software Engineer

- Worked in the UI team as the frontend developer for T-Mobile. Developed the plan selection and phone selection section in the prepaid user flow.
- Wrote test cases for the existing code improving the overall code coverage.
- Modified existing web application to correct errors and to upgrade interfaces and improve performance.

Skills: Angular, Typescript, Jest
